Description

Available for Pre-Order. ETA MAY 2019.

1995 is the third iteration of our Procedural Combat Series and it examines a cold war gone hot during the Yugoslavian wars of succession. The combined might of a Serb dominated JNA and a weakened but still potent Russia move on the smaller republics in an attempt to establish A Serb dominated Yugoslavia giving Russia a foothold in NATO's backyard.

The OOB includes a well researched collection of available divisions and air assets. The Russian OOB is based off the militia which attacked Grozny in 1994. The JNA is accurately represented though assumed to be at full strength. Numerous other Balkan and NATO nations are represented. Political Objectives are borrowed from 1987 but we return to a more Strategic scale than the operational nature of 1987.

Hopefully more details to follow...
