Kharkov: Soviet Spring Offensive Stephen B. Patrick
Simulation: Kharkov S. Patrick, R. Simonsen

Uses the Panzergruppe Guderian system. Situation involves the Soviet counter-offensive in Summer 1942. Some soviet units are

untried...meaning nobody knows their strength until they enter combat for the first time. Unlike PGG, there are no '0' strength units. Typical Eastern Front game with panzers and lots of soviet units.

A Good Condition Punched Copy.
