### Description

Excellent punched copy, content has been well looked after counters are bagged and sorted. Box has smallest scratch marks on bottom side of box, otherwise in great condition.

Monty's Gamble: Market Garden is a simulation of the Allied attack in Holland. The Allied must land paratroopers, seize key bridges, and get XXX Corps up "Hell's Highway" to relieve the British paratroopers in Arnhem, all while the Germans are attempting to break their supply line.

Monty's Gamble features a semi-simultaneous movement System which provides maximum interaction and requires players to make tough choices as every move they make may be countered by their opponent. Both players will have pressing needs up and down "Hell's Highway" but may only address one at a time—hopefully before the variable turn length causes the turn to end!

CONTENTS:
