Description

North Wind is a supplement focusing on the battles from the last German offensive in the Western theater. There are ten scenarios, or separate game situations, based on battles between the inexperienced American divisions of the Seventh Army and German units varying wildly in quality from inept Volksgrenadiers to the tough 10th SS Panzer Division.

This module is not playable by itself, but requires ownership of our Road to Berlin, Battle of the Bulge, Eastern Front and Airborne games and our Red Warriors and Iron Curtain supplements.
