Description

Putin's War: Reclaiming the Soviet Empire in Eastern Europe is a strategic-level, two-player wargame of low-intermediate complexity that covers the campaign that could occur if the Russian dictator decides to give up his strategy of incremental "opaque" warfare and instead simply try for a big win. The game's sub-systems are crafted to present a supreme-commander's-eye-view of such a war. It's therefore almost fully strategic in its perspective, with only the most pastel of operational and tactical undertones added to enhance its tone and texture in those regards. **Putin's War** takes two experienced players only about two hours to complete, and it's adaptable for solitaire play.

Components: One 22" x 34" map & 112 counters
