Description

Vae Victis issue 65:

The game is designed by Jean-Claude Bessida. It covers the first two years of the Seven Years' War (1757-8). Each turn represents forty days of real time, each counter is a "brigade equivalent."

This issue also includes counters and a scenario for "Paris vaut bien une messe" (issue 50), covering the battle of Moncontour (1569), and the usual collection of articles and reviews.

As with all Vae Victis games, the counters need to be cut out and mounted.
